

Council Meeting Staff Report

September 29, 2020

Agenda No.:	B.
Indexes (Council Goals):	* 2020 Council Goal - Investing in Infrastructure
Presenters:	James Alarid
Legislative File:	AGR0716-20

Title

Approval of the Amendment to the Software as a Service/Spectrum and Technical Support Agreement with Sensus USA, Inc., and Amendment No. 1 to Services Agreement No. AGR19-912 with Ferguson, Inc. in the amount of \$108,099.02, plus applicable gross receipts tax, for the Purpose of Implementing an Advanced Metering Infrastructure Customer Portal

Recommended Action

I move that Council approve the Amendment to the Software as a Service/Spectrum and Technical Support Agreement with Sensus USA, Inc., which is Exhibit D to AGR19-912 with Ferguson, Inc., for the purpose of implementing an Advanced Metering Infrastructure (AMI) Customer Portal, funding for which is payable through the Ferguson agreement. I further move that Council approve Amendment No. 1 to Services Agreement No. AGR19-912 with Ferguson, Inc. in the amount of \$108,099.02, plus applicable gross receipts tax for the AMI Customer Portal. I further move that Council authorize the Utilities Manager to sign both amendments.

Utility Manager Recommendation

The Utilities Manager recommends approval as presented.

Body

The purpose of this amendment is for the development, installation, and on-going maintenance of a customer portal for County utility users for ten years. The customer portal will allow County utility customers the ability to access their data recorded by the Sensus Advanced Metering Infrastructure for the purpose of viewing their consumption of natural gas, water and electricity, setting up customized alerts, and providing an additional communication channel to Los Alamos County Department of Public Utilities(DPU).

Customers will have access to usage data associated with their DPU account in 15 minute increments for electric consumption and 60-minute increments for gas and water consumption. Consumption data will be available in a clear easy-to-read dashboard and can be downloaded digitally for customers to track, trend and/or evaluate their consumption. The portal will have a convenient link to view and pay their utility bill. The customer portal will be accessible 24 hours per day, 365 days per year by desktop or mobile internet-based devices using a secure two-way communication between customer portal and user device.

The DPU will have the ability to include customizable administrative utility features and alerts, allowing DPU staff to add custom content, such as conservation tips, leak detection and outage management/notification. The DPU will use the availability of the near real time consumption to create new conservation measures which can now be individualized to each customer.

Alternatives

If the amendment is not approved, staff will pursue other options to provide customer access to their consumption data.

Fiscal and Staff Impact

The first year, one-time expense, to establish the portal is \$22,858.58 and will be funded by approved project contingency. The annual service fees for years 2 through 10 will be budgeted in each respective year totaling \$85,240.44. The amendment allows 1,500 customers to establish accounts on the portal each year. Each portal account in excess of 1,500 are paid individually as scheduled in amendment Attachment B (ranging from \$3.00 in year 1 to \$4.50 in year 10).
