

Manhattan Project Sign

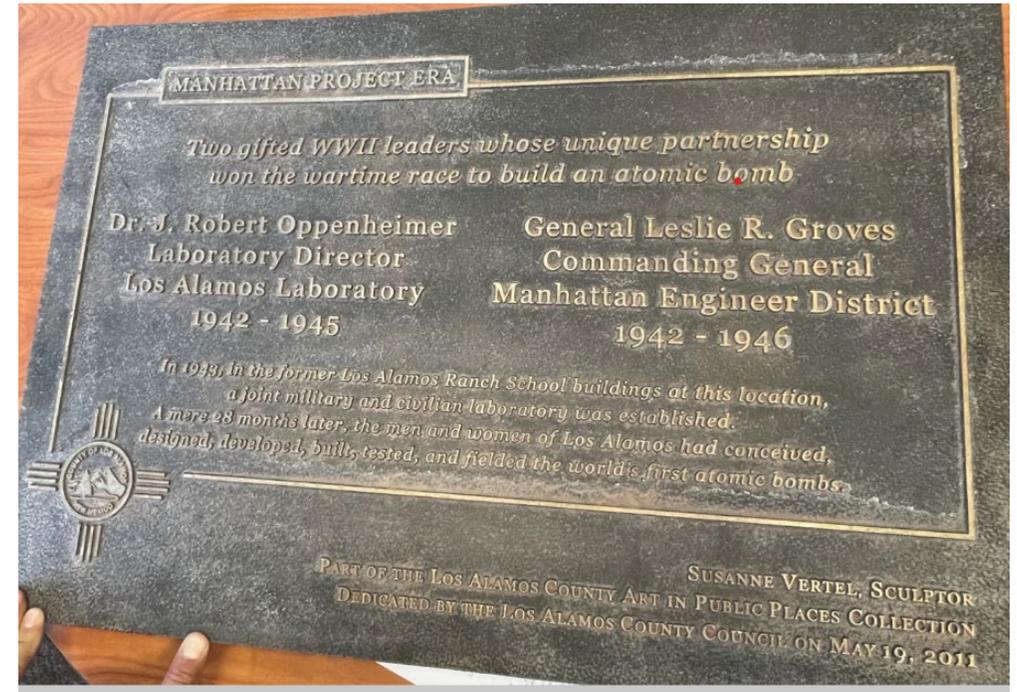

April 25, 2024

Wendy Parker, Parks Superintendent

Manhattan Project Sign

- Sign was struck by a vehicle or equipment in early December 2023. Staff is not sure how the damage occurred.
- LAPD removed the sign and stored it until the Parks Division retrieved the sign.
- Parks attempted to repair the sign and due to the bend, is unable to make the repair.
- The sign is bent which will require a sign company to repair, if possible. It may be too damaged for repairs.

Photos of Sign Damage

Sign Placement Option #1

Placement marker is indicated in blue.

This is our first choice for placement. Visitors can view the plaque while viewing Fuller Lodge and the statues. This location is suitable for wheelchair accessibility and may allow for the sign to be placed at the correct height (40-60" high – 40" off the ground).

Sign Placement Option #2

Placement marker is indicated in blue.

This is our second choice for
placement.

Still a nice viewing area of the lodge
and statues.

Sign Placement Option #3

Placement marker is indicated in blue.

The placement would be between the two statues, which would take away from the ambiance.

Next Step

- Guidance from APP - Repair or replace the sign
 - If repaired, who takes ownership of the process
 - If replaced, will this be an APP initiative
- Select location to install the Manhattan sign at one of the suggested locations.
 - Three options provided with focus on ADA compliance
- The Parks Division will install the sign
