## PRESENTATIONS, PROCLAMATIONS, & RECOGNITIONS

## 20712-25 Presentation on Cartegraph Implementation

**Presenters:** Wendy Parker

Parks Superintendent Wendy Parker and Asst. Superintendent Emmanuel Abeyta provided the Board with a demonstration of the asset management system implemented in the Parks & Open Space division.

## 4. BOARD/STAFF COMMUNICATIONS

## 20724-25 Chairman's Report - Presented by Chair Watkins

**Presenters:** Brian Watkins

Vice-Chair Cowan gave the following updates:

The Open Space Working Group and the Bike Park Working Group provided presentations to Council, which were well received.

Parks & Recreation received a Gold Medal Finalist award.

The Brewer Arena replacement plan is expected to return to Council next month.

## 20710-25 Staff Report

**Presenters:** Katherine Hudspeth and Wendy Parker

<u>Attachments:</u> A - PRB Monthly Updates

Recreation Superintendent Hudspeth and Parks Superintendent Parks provided updates for their respective divisions.

# 20711-25 Work Group and Task Force Assignments and Updates

**Presenters:** Parks and Recreation Board

Vice-Chair Cowan didn't have any updates for these groups.

## 5. COUNCIL COMMUNICATIONS

Councilor Reager was absent. No updates were provided.

### 6. PREVIEW OF NEXT MEETING

Items discussed for next month's meeting include the following:

North Mesa Recreation Plan

### 7. ADJOURNMENT

If you are an individual with a disability who is in need of a reader, amplifier, qualified sign language interpreter, or any other form of auxiliary aid or service to attend or participate in the hearing or meeting, please contact the County Human Resources Division at 505-662-8040 at least one week prior to the meeting or as soon as possible.

Public documents, including the agenda and minutes can be provided in various accessible formats. Please contact the Community Services Department at 505-662-8241 if a summary or other type of accessible format is needed

## Comments on Proposed Relocation of North Mesa Community Garden Plots

Having been alerted to the agenda item on tonight's Parks & Rec Board meeting, I forwarded the propose'd movement of the North Mesa Community Garden plots to as many of the gardeners for which I had emails. My comments echo those received and are here listed.

- The users (renters) of the North Mesa Community Garden plots were not asked for input on the move. Given that we receive regular emails from the Parks Department with our individual water usage, it would have been very easy and appropriate to inform us of the North Mesa Recreation Area Master Plan work. This 'last minute' input could well have been avoided with proper notification.
- 2. Some of the renters of the North Mesa Community Garden plots have been gardening in that location for up to 30 years. That is 30 years of soil improvement, hardscape installation, and meaningful tending of the area. Moving the garden site to a new location will force a restart on the soil and understanding of the environmental factors (sun, wind, pests). I have maintained at least one plot at the garden since 1995.
- 3. Many of the renters have perennial vegetables/fruits in their plots. Moving of the plants will cause a set-back in production.
- 4. With respect to hardscape, many of the users have built deer fencing around their plots from simple to robust. The cost of putting up the fencing was borne by the renters. Many people have also constructed raised beds, trellises and irrigation systems.
- 5. The County has invested significant monies into placing individual water meters so that water usage can be accurately attributed to specific users.
- 6. If part of the reason for the move is to expand the garden, know that use has dropped on the current footprint. The Community Gardens could also be expanded where they are by moving the compost pile, adding border fencing, and weeding the area. Also, stricter adherence to the Garden Rules could free up some of the current plots.

For these reasons, I strongly recommend leaving the North Mesa Community Garden plots where they are. There has been much investment, sometimes decades, in plot improvements and environmental assessment in order to grow productive gardens. It seems that the Maintenance Yard could be placed in an area that does not require the upheaval of the North Mesa Community Garden Plots.

Respectfully,

Janine Fales 115 Alhambra Drive White Rock, NM -----Original Message-----

Subject: North Mesa Park Plan meeting tonight Oct 9

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Wendy, the email link for the PNB won't go through. Could somehow you transfer my comments below?

Dear Parks and Recreation Board,

At the last council meeting, the bicycle group indicated that they wanted changes to this plan before you tonight. Particularly in regard to the size of the bicycle area.

My comments below are as a member of the Stables community and also as a designer. It's a beautiful design as shown yet I think still could serve everyone better with some changes:

- 1. Leave the garden patches in the location as they are now with no maintenance yard there. The existing gardens are good neighbors for the stables, and the home that is adjacent.
- 2. Recognize and keep the well-established pathway through the fence at the SW corner of the Stables, the outside of Lot 132 that is used by the south community to get to and around the Stables.
- 3. The planned sand volleyball courts are in areas that are needed for parking for the rodeo. In general, the rodeo parking looks to be less than needed unless multi use areas (grassland) is used as we do now. At last summer's rodeo, even with less attendance than usual because of lack of a stadium, I counted over 100 cars in the late afternoon.
- 4. Parking for the bike park, and the facility building #16 could be more secure and accessible if it was closer to San Ildefonso Road. It could be at Area #29.

Thank you for this interactive process and your consideration.

Sincerely,

Peggy Dare 65 Obsidian Loop
