5. PRESENTATIONS AND DISCUSSION ITEMS (Action maybe taken on these items)

[20602-25](#) Bicycle Working Group Presentation

Presenter: David Hampton, Chair, Transportation Board

Recommendations focused on bicycle/pedestrian safety and traffic calming.

Preference for physical speed controls, residential speed enforcement, through-traffic reduction, infrastructure changes (speed tables, raised crossings, temporary closures).

Specific suggestions: Pedestrianization of Trinity post-rebuild, raised crossings at Urban and Diamond, targeted slowing of traffic in key areas. Staff to assess feasibility and determine actionable items.

Board Deliberations:

Central Avenue One-Way Proposal: Concerns regarding business impacts, downtown accessibility, and driver confusion. General opposition.

Other issues: Protected intersections, bollards, speed tables (maintenance and emergency access concerns).

Speed reduction to 10 mph on shared roads viewed as impractical.

After multiple revisions, the Board adopted the following motion:

A motion was made by Member Lisowski, seconded by Chair Hampton that the Transportation Board thank the Bicycle Working Group for their work and recommend that the guidelines in the 2025 Bicycle Working Group Report on Concepts and Recommendations for Bicycle Infrastructure and Design in Los Alamos County as stated on pages 18 & 19 of the presentation with the exception of turning Central Avenue into a one-way street, be considered on transportation projects as deemed appropriate by Public Works engineering staff.

The motion passed 5-1 with Member Muck in opposition.

Councilor Hand noted similar concerns during earlier County tour. Permanent options (e.g., bollards) require State Historic Preservation Office review.
