## INCORPORATED COUNTY OF LOS ALAMOS INVESTMENT POLICY Updated May 24, 2005

### I. SCOPE

This policy applies to the investment of funds of the Incorporated County of Los Alamos (the County).

### II. GENERAL OBJECTIVES

1. Investment goals. County funds shall be invested by the investment officer in an effort to:

- a. Maximize investment returns while minimizing risk;
- b. Maintain a level of liquidity to ensure meeting unanticipated cash needs;
- c. Allow for diversification of the county's portfolio;
- d. Recognize the impact of the county's investment program on the local economy; and
- e. Minimize the amount of money in non-interest-bearing accounts.

2. Criteria for investment selection. The criteria for selecting investments shall be in the following order of priority safety, liquidity, and total return :

a. **Safety.** Safety of principal is the foremost objective of the investment program. Investments shall be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio. The objective will be to minimize credit risk and interest rate risk.

i. Credit Risk. The County will minimize credit risk, the risk of loss due to the failure of the security issuer or backer, by:

- Limiting investments to securities as authorized in the County Code;
- Pre-qualifying the financial institutions, broker/dealers, intermediaries, and advisers with which the County will do business; and
- Diversifying the investment portfolio so that potential losses on individual securities will be minimized.

ii. Interest Rate Risk. The County will minimize the risk that the market value of securities in the portfolio will fall due to changes in the general level of interest rates, by:

- Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations and also satisfying requirements for cash reserves, thereby avoiding the need to sell securities on the open market prior to maturity.

b. **Liquidity.** The investment portfolio shall remain sufficiently liquid to meet all cash flow requirements that may be reasonably anticipated. This is accomplished by structuring the portfolio so that securities mature concurrent with cash needs to meet anticipated demands (static liquidity). Furthermore, since all possible cash demands cannot be anticipated, the portfolio of operating investments should consist largely of securities with active secondary or resale markets (dynamic liquidity).

c. **Total Return .** Return on investment is of secondary importance compared to the safety and liquidity objectives described above. Within the constraints of prudent safety and liquidity parameters listed above, the portfolio shall be designed with the objective of attaining a market rate of return. Total returns will be maximized within these constraints.

3. Trading Restrictions. Securities shall not be sold prior to maturity with the following exceptions:

- a. A security with declining credit may be sold early to minimize loss of principal;

- b. A security swap would improve the quality, total return , or target duration in the portfolio; or
- c. Liquidity needs of the portfolio require that the security be sold.

### III. SAFEKEEPING, CUSTODY, AND TRADING

1. **Authorized Financial Dealers and Institutions.** The finance division will maintain a list of financial institutions authorized to provide investment services and a list of approved security broker/dealers selected by creditworthiness. All financial institutions and broker/dealers who desire to become qualified for investment transactions must supply each of the following:

- a. Audited financial statements,
- b. Proof of National Association of Securities Dealers (NASD) certification,
- c. Proof of New Mexico state registration,
- d. Completed broker/dealer questionnaire, and
- e. Certification of having read and understood and agreeing to comply with the County's investment policy.

An annual review of the financial condition and registration of qualified financial institutions and broker/dealers will be conducted by the investment officer.

2. **Internal Controls.** The investment officer is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the County are protected from loss, theft or misuse. The internal control structure shall be designed to provide reasonable assurance that these objectives are met. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the valuation of costs and benefits requires estimates and judgments by management. An annual independent review by an external auditor shall assure compliance with policies and procedures.

The internal controls shall address the following points:

- a. Control of collusion,
- b. Separation of transaction authority from accounting and recordkeeping,
- c. Custodial safekeeping,
- d. Avoidance of physical delivery securities wherever possible,
- e. Clear delegation of authority to subordinate staff members,
- f. Written confirmation of transactions for investments and wire transfers, and
- g. Development of a wire transfer agreement with the lead bank and third-party custodian.

3. **Authorized Signatures.** The finance division will maintain a list of all authorized signatories for all authorized County bank and investment accounts. The County Council will approve this list at least annually or whenever a signature is added or deleted from the master list which ever is sooner.

4. **Trading Procedures .** The investment officer shall, whenever possible, obtain a minimum of three verbal or electronic bids/offers to obtain the best price for the County on all securities trades.

- a. To encourage local investing, at least one local Los Alamos broker will be included on all trades if available.
- b. Tie bids/offers will be decided by a coin toss, unless one of the tie firms proposed the trade or is a local broker.
- c. Brokers proposing a securities trade shall be protected if the trade is executed and will win any ties.
- d. Local brokers will win any remaining ties.
- e. Best price and execution will not be compromised.

f. The winner on all trades will be included on the competing list for the following trade unless, in the judgment of the staff, the firm does not have good capabilities in the sector related the subsequent trade.

g. Bond exchanges will be managed under the following guidelines:

- i. Recognizing the value of original ideas, proposed bond exchanges will not be shopped among other brokerage firms.
- ii. If uncertainty exists concerning the levels of the bid or offer prices on the proposed exchange, the level(s) should be checked with at least one other firm.
- iii. If a higher bid or offer is found, the proposing firm shall be given the opportunity to improve their bid or offer. The proposing firm shall win any ties.

A bid/offer form will be completed which will include date, type of investment, purchase date, maturity date, amount to be invested, institution name, contact name, investment type, face value, discount, and cost. Authorization for all investments shall be in writing.

#### IV. AUTHORIZED INVESTMENTS

Authorized investments are defined in Section 20-403 of the County Code.

#### V. INVESTMENT PARAMETERS

1. **Diversification.** The investments shall be diversified by:

- a. limiting investments to avoid overconcentration in securities from a specific issuer or business sector (excluding U.S. Treasury securities),
- b. limiting investment in securities that have higher credit risks,
- c. investing in securities with varying maturities, and
- d. continuously investing a portion of the portfolio in readily available funds to ensure that appropriate liquidity is maintained in order to meet ongoing obligations.

e. To maintain adequate diversification, the investment portfolio shall not have more than 20% of the portfolio invested in securities of a single issuer with the following exceptions:

- i. U.S. Government Obligations, deposits with the New Mexico State Treasurer's Local Government Investment Pool, and investments with the New Mexico State Investment Council's Long-term Investment Funds;
- ii. Repurchase agreement associated with required debt service reserves that are collateralized in accordance with code section 20-406; and
- iii. Deposits in a local qualified financial institution that are 100% collateralized in accordance with Section 20-403 of the County Code. This exception recognizes the impact of the county's investment program on the local economy.

2. **Maximum Maturities.** To the extent possible, the investment officer shall attempt to match the investment maturities with the anticipated cash flow requirements of the County. Unless designated as long-term funds or matched to a specific cash flow, the County will not invest its pooled investment funds directly in securities maturing more than five (5) years from the date of purchase, other than the portion of the pooled funds determined to be long-term in nature.

3. **Long-term Investments.** The County has institutional balances that are inherently or explicitly long-term in nature, including balances in the general county pooled investments (no more than 50% of the total), the capital projects permanent fund, the cemetery fund, and the utility decommissioning account. These funds, reserve funds and other funds with longer-term investment horizons may be invested in securities exceeding five (5) years if the maturity of such investments are made to coincide as nearly as practicable

with the expected use of funds. The intent to invest in securities with longer maturities shall be disclosed in writing to the County Council.

Investments in the New Mexico State Investment Council’s long-term investment funds shall be made in accordance with the following asset allocation guidelines:

	<u>Target Weight</u>	<u>Target Range</u>
Fixed Income (Bonds)	30%	15-45%
Core Bond Fund	20%	10-35%
High Yield Bond Fund	10%	5-20%
Domestic Equity	55%	35-75%
Large Cap. Active and Index Funds	40%	20-60%
Mid/Small Cap. Active Fund	15%	5-30%
International Equity	15%	5-25%
Non-U.S. Active Fund	12%	5-20%
Emerging Markets Fund	3%	0-10%

It is recognized that economic and market conditions will cause the asset allocations to fluctuate within the target ranges.

4. **Collateralization.** New Mexico state law require that all certificates of deposit, money market, checking accounts, and any other investments not backed by the full faith and credit of the United States Government, other than investments in the New Mexico State Investment Council long-term investment funds, be secured by pledged collateral of at least 50 percent of the current market value. This collateral will be pledged in the name of the County and held by a third party institution, Federal Reserve Bank, or by a trust institution within the same bank as approved by the investment officer. The institution will issue safekeeping receipts to the County for securities held by a third party. The County will require that at all times, pledged collateral will be equal to, or greater than, 50 percent of the current market value of the County's applicable investments.

5. **Local Preference for Investing.** The investment officer will, whenever possible, try to invest funds which benefit the local economy on a competitive bid basis. The County code allows preference be given to local qualified financial institutions whenever competing bids from out-of-town qualified financial institutions do not exceed the highest bid from the local financial institutions.

## VI. REPORTING

1. **Methods.** The investment officer shall prepare an investment report at least quarterly, including a management summary that provides an analysis of the status of the current investment portfolio and transactions made over the reporting period . This management summary will be prepared in a manner which will allow the County to ascertain whether investment activities during the reporting period have conformed to the investment policy. The report should be provided to the County Administrator and the County Council. The report will include the following:

- a. Listing of individual securities held at the end of the reporting period.
- b. Changes from the previous report.
- c. Schedule of collateral.
- d. The cost and market value of individual securities.
- e. Average weighted yield to maturity of portfolio on investments as compared to applicable benchmarks.
- f. Listing of investment by maturity date.
- g. Percentage of the total portfolio which each type of investment represents.

2. **Performance Standards.** The investment portfolio will be managed in accordance with the parameters specified within this policy. A set of appropriate benchmarks shall be selected to use in evaluating portfolio performance on a regular basis.

## VII. POLICY CONSIDERATIONS

1. **Exemption.** Any investment currently held that does not meet the guidelines of this policy shall be exempted from the requirements of this policy. At maturity or liquidation, such monies shall be reinvested only as provided by this policy.

2. **Amendments.** This policy shall be reviewed by the investment officer on an annual basis and be revised to reflect changes in policy required by a changing investment market, changes required by federal, state or local laws, or changes to administrative policy. Any changes must be approved by the County Council.

**I. INTRODUCTION**

The Incorporated County of Los Alamos (County) is governed by a Charter, and a Municipal Code of Ordinances, and applicable state and federal laws. The County exercises powers of a county and a municipal corporation under the constitution and laws of the State of New Mexico. Section 103 of the County Charter provides for maximum self-government and home-rule powers as provided in Article X, Section 6, of the Constitution of the State of New Mexico and in the Municipal Charter Act.

**II. POLICY STATEMENT**

The County has unrestricted general funds, debt service funds, capital project funds and permanent funds. It is imperative that the County forecast cash flow needs to ensure that liabilities can be paid in a timely manner. Managing deposits and investments requires the County to protect these financial assets from material loss by minimizing market risk, interest rate fluctuations, credit risk and liquidity. Once sufficient liquidity is ensured and risk is minimized, the County focuses on maximizing total return on invested assets.

**III. GOVERNING AUTHORITY**

The deposit and investment of County funds is addressed in the Municipal Code Chapter 20, Article IV – “Deposit and Investment of County Funds”. The Investment Officer is defined under Section 20-402 as the Chief Financial Officer or designee.

The County’s deposits and investments shall be operated in conformance with County Code, New Mexico State law, and applicable Federal law; specifically, this deposit and investment policy is written in conformance with §6-10-10, NMSA 1978. All funds within the scope of this policy are subject to all applicable laws. Any amendments to state law shall be incorporated into this policy as appropriate for the County Investment program.

**IV. SCOPE**

This policy applies to the ~~investment of funds~~ deposits and investments of the ~~Incorporated County of Los Alamos (the County).~~

**H. GENERAL OBJECTIVES**

- ~~1. Investment goals. County funds shall be invested by the investment officer in an effort to:~~
  - ~~a. Maximize investment returns while minimizing risk;~~
  - ~~b. Maintain a level of liquidity to ensure meeting unanticipated cash needs;~~
  - ~~c. Allow for diversification of the county's portfolio;~~
  - ~~d. Recognize the impact of the county's investment program on the local economy; and~~
  - ~~e. Minimize the amount of money in non interest bearing accounts.~~
- ~~2. Criteria for investment selection. The criteria for selecting investments shall be in the following order of priority safety, liquidity, and total return:~~

~~a. Safety.~~  
General Funds: Most cash belonging to all funds (excluding certain segregated and restricted cash and investment balances) is pooled into one common account to optimize investment opportunities. Each fund whose monies are deposited in the pooled cash account has equity therein. Interest earned on the

investment of these monies is allocated to substantially all of the County's funds based upon relative equity at year-end. Funds that are solely funded by transfers from the general fund and certain grant funds may not receive interest income. Significant negative balances incurred in pooled cash at year-end are treated as interfund receivables of the General Fund and interfund payables of the deficit fund, except where the deficit fund has liquid investments to offset the deficit in pooled cash. In such cases, the investments are shown net of the pooled cash deficit.

Capital Projects Permanent Funds: The Capital Projects Permanent Fund accounts for amounts set aside by the County Council and the County Charter for capital projects. These amounts are designated for long-term investing. The real value of the fund principal is required by County Charter to be maintained at an annual level that keeps pace with the implicit price deflator for the gross domestic product (GDP). **IV. SCOPE**

This policy applies to the deposits and investments of the County.

General Funds: Most cash belonging to all funds (excluding certain segregated and restricted cash and investment balances) is pooled into one common account to optimize investment opportunities. Each fund whose monies are deposited in the pooled cash account has equity therein. Interest earned on the investment of these monies is allocated to substantially all of the County’s funds based upon relative equity at year-end. Funds that are solely funded by transfers from the general fund and certain grant funds may not receive interest income. Significant negative balances incurred in pooled cash at year-end are treated as interfund receivables of the General Fund and interfund payables of the deficit fund, except where the deficit fund has liquid investments to offset the deficit in pooled cash. In such cases, the investments are shown net of the pooled cash deficit.

Capital Projects Permanent Funds: The Capital Projects Permanent Fund accounts for amounts set aside by the County Council and the County Charter for capital projects. These amounts are designated for long-term investing. The real value of the fund principal is required by County Charter to be maintained at an annual level that keeps pace with the implicit price deflator for the gross domestic product (GDP). The permanent fund has a portion of fund balance Restricted for Income Stabilization in accordance with County Code Sec. 20-361. This arrangement establishes a cushion in the fund, to allow market fluctuations affect the stabilization balance without impacting the real value of principal.

Cemetery Funds: The Cemetery Fund is a permanent fund set aside for the perpetual care of the Guaje Pines Cemetery. Sixty percent of all funds received from the sale of cemetery spaces is maintained in the perpetual fund and is designated for long-term investing.

Utility Funds: Utility funds shall be invested according to this deposit and investment policy.

Unexpended Bond Proceeds: Federal income laws generally restrict the ability to earn arbitrage in connection with tax-exempt bonds. Every attempt shall be made to eliminate or minimize negative arbitrage.

**V. GENERAL OBJECTIVES**

All funds shall be invested in a manner that is in conformance with applicable federal, state and other legal requirements. In addition, the objectives of the investment activities, in order of priority, will be Safety, Liquidity, and Return. Details on these objectives are as follows:

- a. **Safety:** Safety of principal is the foremost objective of the investments. Investments shall be undertaken in a manner that seeks to ensure the preservation of capital in the overall investment portfolio. The objective shall be to minimize credit risk and interest rate risk.
  - i. **Credit Risk.** The County shall minimize credit risk and the risk of loss due to the failure of the security issuer or backer, by:
    - Limiting investments to securities as authorized in Section X. “Authorized Investments” of this policy ;
    - Pre-qualifying the financial institutions, broker/dealers, intermediaries, and advisers with which the County does business; and
    - Diversifying the investment portfolio so that potential losses on individual securities will be minimized.
  - ii. **Interest Rate Risk.** The County shall minimize the risk of the decline of market value of securities due to changes in the general level of interest rates, by:
    - Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations while also satisfying requirements for cash reserves, thereby avoiding the need to sell securities on the open market prior to maturity.
- b. **Liquidity:** The investment portfolio shall remain sufficiently liquid to meet all cash flow requirements that may be reasonably anticipated. This is accomplished by structuring the investment portfolio so that securities mature concurrent with cash needs to meet anticipated demands (static liquidity). Furthermore, since all possible cash demands cannot be anticipated, the investment portfolio of operating investments should consist largely of securities with active secondary or resale markets (dynamic liquidity).
- c. **Return on Investment:** Return on investment is of secondary importance compared to the safety and liquidity objectives described above. Within the constraints of prudent safety and liquidity parameters listed above, the investment portfolio shall be designed with the objective of attaining a market rate of return. Total returns shall be maximized within these constraints.

**VI. IDENTIFICATION OF STRATEGY**

**Liquidity Funds:** Investments that are needed for ongoing disbursements for the operations and project funds of the County.

**Investment Funds:** Intermediate to Short Duration Portfolio of allowable investments that is funded by excess liquidity balances of the County.

**Permanent Funds:** Longer-term Portfolio that is invested to achieve optimal investment returns over longer term investment horizons.

**XI. INVESTMENT PARAMETERS**

- a. **Diversification.** It is the policy of the County to diversify its investment portfolios to the extent reasonably practical. Assets shall be diversified to reduce the risk of loss resulting from an over-concentration of assets in a specific maturity, a specific issuer or a specific class of securities. Portfolio maturities may be laddered to avoid undue concentration of assets in a specific maturity sector and to reflect cash flow requirements. The County may choose any variation of the following, and is limited to 100% of the amount of its investment.

**Total Portfolio Diversification Constraints:**

- b. **Maximum Maturities.** To the extent possible, the Investment Officer shall attempt to match the investment maturities with the anticipated cash flow requirements of the County. Unless designated as long-term funds or matched to a specific cash flow, the County will not invest its pooled

investment funds directly in securities maturing more than ten (10) years from the date of purchase, other than the portion of the pooled funds determined to be long-term in nature.

These funds, reserve funds and other funds with longer-term investment horizons may be invested in securities exceeding five (5) years if the maturity of such investments are made to coincide as nearly as practicable with the expected use of funds. The intent to invest in securities with longer maturities shall be disclosed in writing to the County Council.

Investments in the New Mexico State Investment Council’s long-term investment funds shall be made in accordance with established strategic asset allocation guidelines. It is recognized that economic and market conditions will cause the asset allocations to fluctuate within the target ranges.

- d. Collateralization.** New Mexico state law requires that all certificates of deposit, money market, checking accounts, and any other investments not backed by the full faith and credit of the United States Government, other than investments in the New Mexico State Investment Council long-term investment funds, must be collateralized at 50 percent of the current market value. The County requires that, at all times, pledged collateral be equal to, or greater than, 100 percent of the current market value of the County's applicable investments. This collateral shall be pledged in the name of the County and held by a third party institution, Federal Reserve Bank, or by a trust

institution within the same bank as approved by the Investment Officer. The institution shall issue safekeeping receipts to the County for securities held by a third party.

**XII. GUIDELINE MEASUREMENTS**

**a. Compliance.**

- ii. If the investment portfolio falls outside of compliance with this deposit and investment policy or is being managed inconsistently with this policy, the Investment Officer shall bring the portfolio back into compliance in a prudent manner and as soon as prudently feasible.
- iii. All action and violations of this deposit and investment policy (transactions, actions to bring the portfolio back into compliance, and reasoning for actions taken to bring the portfolio back into compliance) shall be documented and reported to the County Manager in a timely manner.
- iv. Due to fluctuations in the aggregate surplus funds balance, maximum percentages for a particular issuer or investment type may be exceeded at a point in time. Securities need not be liquidated to realign the portfolio; however, consideration should be given to this matter when future purchases are made to ensure that appropriate diversification is maintained.

**b. Performance Standards.** The investment portfolio shall be managed in accordance with the parameters specified within this policy.

- i. The County yields will be compared to the LGIP rates.
- ii. The investment portfolio shall be invested into a predetermined structure that shall be measured against a selected benchmark portfolio. The structure shall be based upon a chosen minimum and maximum effective duration and shall have the objective to achieve market rates of returns over long investment horizons. The purpose of the benchmark is to appropriately manage the risk in the portfolio given interest rate cycles. The core portfolio is expected to provide similar returns to the benchmark over interest rate cycles but may underperform or overperform in certain periods. The portfolio shall be positioned to first protect principal and then achieve market rates of return. The benchmark used shall be a 0-3 year or 0-5 year standard market index and comparisons shall be calculated monthly and reported quarterly.
- iii. When comparing the performance of the County's portfolio, all fees and expenses involved with managing the portfolio shall be included in the computation of the portfolio's rate of return.
- iv. The mark to market pricing will be calculated monthly and be provided in a monthly report.

**c. Monitoring and Portfolio Adjustment.** This policy sets forth concentration constraints and minimum credit ratings for each type of security. These limits apply to the initial purchase of a security and do not automatically trigger the sale of a security as the portfolio value fluctuates or in the event of credit rating downgrade. As a general practice, securities will be purchased with the intent to hold to maturity. However, it is acceptable for securities to be sold under the following circumstances:

- i. A security with declining credit may be sold early to minimize loss of principal;
- ii. The portfolio duration or maturity buckets should be adjusted to better reflect the structure of the underlying benchmark portfolio;

- iii. A security exchange that would improve the quality, yield and target maturity of the portfolio based on market conditions;
- iv. A sale of a security to provide for unforeseen liquidity needs.

### **XIII. REPORTING**

**a. Methods.** The Investment Officer shall prepare an investment report at least annually, including a management summary. The management summary shall be prepared in a manner to allow the County to ascertain whether investment activities during the reporting period have conformed to the deposit and investment policy. The report shall be provided to the County Manager and the County Council. The report shall include the following:

- i. Listing of individual securities held at the end of the reporting period, and
- ii. Changes from the previous report, and
- iii. Schedule of collateral, and
- iv. The cost and market value of individual securities, and
- v. Average weighted yield to maturity of portfolio on investments as compared to applicable benchmarks, and
- vi. Listing of investment by maturity date, and
- vii. Percentage of the total portfolio of which each type of investment represents.

### **XIV. BUSINESS CONTINUITY**

The Investment Officer shall implement procedures that maintain continuity of operations related to the investment program while also maintaining proper internal controls. Some examples include:

- Utilize Advisor to access investment data and monitor trades with brokers even when working remotely.
- Centralized investment software that allows personnel to access data for conducting daily funding and accounting of investment settlements.
- Report of daily transactions to and from safekeeping.
- Recording of deposits and withdrawals to and from LGIP.
- Journal entries of net investments and cash activity related to investments.
- Maintenance of written procedures and documentation that provide guidance and instruction in the absence of Investment Officer.

### **XV. POLICY ADOPTION**

This policy shall be reviewed by the Investment Officer every two years and be revised to reflect changes in policy required by a changing investment market, changes required by federal, state or local laws, or changes to County policy. Any changes must be approved by the County Council.
