RE: Motorola Quote for (50) Cap-Ex V300+(30) 5-Yr Video Mgr. Cloud Storage Los Alamos PD  
Dear Derrill Rodgers - Deputy Chief Purchasing Officer,

Motorola Solutions is pleased to present Los Alamos Police Department with this quote for quality communications equipment and services. The development of this quote provided us the opportunity to evaluate your requirements and propose a solution to best fulfill your communications needs.

This information is provided to assist you in your evaluation process. Our goal is to provide Los Alamos Police Department with the best products and services available in the communications industry. Please direct any questions to David McNulty at [David.McNulty@motorolasolutions.com](mailto:David.McNulty@motorolasolutions.com).

We thank you for the opportunity to provide you with premier communications and look forward to your review and feedback regarding this quote.

Sincerely,

David McNulty

Billing Address:  
 LOS ALAMOS COUNTY POLICE  
 DEPT

## Pricing Summary

	Sale Price	
Upfront Costs for Hardware, Accessories and Implementation (if applicable), plus Subscription Fee	\$165,540.00	\$0.00
Year 2 Subscription Fee	\$70,250.00	\$0.00
Year 3 Subscription Fee	\$70,250.00	\$0.00
Year 4 Subscription Fee	\$70,250.00	\$0.00
Year 5 Subscription Fee	\$70,250.00	\$0.00
<b>Grand Total System Price</b>	<b>\$446,540.00</b>	<b>\$0.00</b>

### Notes:

- Additional information is required for one or more items on the quote for an order.
- This quote contains items with approved price exceptions applied against them.
- NASPO Contract Number OK-MA-145-010 SW1057W

Purchasing off of the NASPO contract saves you shipping costs, but more importantly, it allows you the opportunity to purchase from a pre-negotiated contract, allowing you to avoid the RFP process altogether.

Approximate Product & Services Delivery Lead Times:

Body-Worn Cameras (BWC) & In-Car Video Systems (ICV) Shipment After Receipt of Order (ARO): 6-12 weeks

Deployment & Commissioning (after receipt of product shipment): 12-16 weeks

Total Lead Time: 18-28 weeks ARO

- Unless otherwise noted, this quote excludes sales tax or other applicable taxes (such as Goods and Services Tax, sales tax, Value Added Tax and other taxes of a similar nature). Any tax the customer is subject to will be added to invoices.
- Unless otherwise noted in this quote / order, installation of equipment is not included.

Any sales transaction following Motorola's quote is based on and subject to the terms and conditions of the valid and executed written contract between Customer and Motorola (the "Underlying Agreement") that authorizes Customer to purchase equipment and/or services or license software (collectively "Products"). If no Underlying Agreement exists between Motorola and Customer, then Motorola's Standard Terms of Use and Motorola's Standard Terms and Conditions of Sales and Supply shall govern the purchase of the Products.

## V300 BODY-WORN CAMERA SOLUTION DESCRIPTION

The V300 Body-Worn Camera captures clear video and audio of every encounter from the user's perspective. Its continuous-operation capabilities allow constant recording, helping the user to capture every detail of each situation and create a reliable library of evidence for case-building and review.

The V300 is easy to operate, with four control buttons. Its built-in Record-After-the-Fact® (RATF) technology enables the device to capture important video evidence that can be retrieved hours or days after an incident occurs, even if a recording is not triggered by the user or sensor. With RATF, officers can prioritize response to immediate threats over manually activating their camera.

### KEY FEATURES OF THE V300

- **Detachable Battery** - The V300's detachable battery allows officers to switch to a fully-charged battery if their shift goes longer than expected. And since batteries can charge without being attached to a camera, they can be kept fully charged and ready to go in a dock for use. This feature is especially helpful for agencies that share cameras among multiple officers.
- **Wireless Uploading** - Recordings made by the V300 can be uploaded to your agency's evidence management system via WiFi or LTE networks. This enables easy transfer of critical recordings to headquarters for immediate review or long-term storage.
- **Data Encryption** - The V300 uses FIPS-140-2 compliant encryption at rest and in transit. This ensures that recordings made by your agency's officers are secure from unauthorized access.
- **Record-After-The-Fact®** - Our patented Record-After-the-Fact® technology records even when the recording function isn't engaged. These recordings are uploaded to the evidence management system and allow users to review important evidence that was captured days before.
- **Natural Field of View** - The V300 eliminates the fisheye effect from wide-angle lenses that warps video footage. Distortion correction ensures a clear and complete evidence review process.
- **SmartControl Application** - Motorola's SmartControl Application allows V300 users to tag and preview video, livestream from the camera to the app, adjust vertical field of view, and change camera settings. This application is available for iOS and Android.
- **In-Field Tagging** - The V300 enables easy in-field event tagging. It allows officers to view event tags and save them to the appropriate category directly from the camera or via smartphone application. This is made easier in conjunction with an integrated in-car video recording system.
- **Auto Activation** - Multiple paired V300 cameras and in-car systems can form a recording group, which can automatically start recording when one of the group devices starts a recording. They can be configured to initiate group recording using triggers like lights, sirens, doors, gun racks, and other auxiliary inputs. Up to eight V300 cameras can also collaborate on recordings without an in-car system, using similar triggers. Group recordings are uploaded and automatically linked in DEMS as part of one incident.

## V300 AND IN-CAR VIDEO INTEGRATION

The V300 integrates seamlessly with the M500 and 4RE In-Car Video System, capturing video of an incident from multiple vantage points. With these in-car video systems, all critical functions are never more than three taps away. This integration includes the following features:

- **Distributed Multi-Peer Recording** - Multiple V300 cameras and in-car systems can form a recording group and, based on configuration, automatically start recording when one of the group devices begins recording. Group recordings are uploaded and automatically linked in DEMS as part of one incident.
- **Automatic Tag Pairing** - Recordings captured by integrated in-car systems and V300 cameras can be uploaded to DEMS with the same tags automatically. From the in-car system's display, the videos can be saved under the appropriate tag category. The tag is then automatically shared with the V300 video and is uploaded as part of one incident, along with the officer's name.
- **Evidence Management Software** - When body-worn and in-car cameras both record the same incident, Motorola's evidence management software automatically links those recordings based on officer name, date, and time overlap associated with the devices.
- **Additional Audio Source** - The V300 can serve as an additional audio source when integrated with the in-car video system. The V300 also provides an additional view of the incident and inherits the event properties of the in-car system's record, such as officer name, event category, and more, based on configuration.

## V300 AND APX RADIO INTEGRATION

Motorola's APX two-way radios that are equipped with Bluetooth capability can pair with V300 Body-Worn Cameras to capture video evidence. When the APX's emergency mode button is pressed, the V300 is automatically triggered to capture video evidence. The recording will continue until stopped by the officer via the start/stop button on the V300 or group in-car video system.

## HOLSTER AWARE INTEGRATION

V300 integrates with Holster Aware, a holster sensor that automatically prompts the V300 to record the moment holstered equipment is drawn. All sensor and V300 associations can be managed within any DEMS. This sensor allows officers to record high-stress events as they unfold, without having to sacrifice situational awareness by manually activating the V300.

## DOCKING STATIONS

The V300 has three docking options:

**Transfer Station** - The Transfer Station is built for large, multi-location agencies with large numbers of V300 cameras in service at any given time. It can charge up to eight fully assembled cameras or individual battery packs. Each of the eight docking slots includes an LED indication of battery charging status and upload status. While a V300 is being charged, the Transfer Station can automatically offload its recording to Evidence Management Solution via an integrated 10Gb/1Gb connection to the local area network (LAN). The Transfer Station connects directly to the local area network for fast offload of recorded events to storage while charging the camera battery. The Transfer Station supports comprehensive device management capabilities, such as camera configuration, checkout and officer assignment options; rapid checkout, kiosk, and individual camera checkout; automatic firmware and configuration updates.

**USB Base** - The USB Base charges the battery of a single V300 camera or a standalone battery pack. The USB Base can be mounted in a vehicle or attached to a desktop or Mobile Data Computer, with 12V or a USB connection for power. It has LED indications of battery charging status and upload, and an ambient light sensor for optimal LED brightness control, from the bright sunlight, to the dim interior of a patrol car. When connected to a laptop or desktop, the USB Base can be used to upload recordings to an evidence management system, receive firmware and configuration updates.

**Wi-Fi Base** - The Wi-Fi Base is mounted in the vehicle. It facilitates V300 upload of evidence to evidence management system, firmware updates, communication between V300 and in-car group devices, charges fully assembled V300 cameras or individual battery packs and more. It has LED indications of battery charging status and upload, and an ambient light sensor for optimal LED brightness control, from the bright sunlight, to the dim interior of a patrol car.

## VIDEO EVIDENCE STATEMENT OF WORK

### Overview

In accordance with the terms and conditions of the Agreement, this Statement of Work (“SOW”) defines the principal activities and responsibilities of all parties for the delivery of the Motorola Solutions, Inc. (“Motorola”) system as presented in this offer to the Customer (hereinafter referred to as “Customer”). For the purposes of this SOW, Motorola may include our affiliates, subcontractors, and third-party partners, as the case may be.

Deviations and changes to this SOW are subject to mutual agreement between Motorola and the Customer and will be addressed in accordance with the change provisions of the Agreement.

Unless specifically stated, Motorola work will be performed remotely. Customer will provide Motorola resources with direct network access sufficient to enable Motorola to fulfill its delivery obligations.

The number and type of software or subscription licenses, products, or services provided by or on behalf of Motorola are specifically listed in the Agreement and any reference within this SOW, as well as subcontractors’ SOWs (if applicable), does not imply or convey a software or subscription license or service that is not explicitly listed in the Agreement.

### AWARD, ADMINISTRATION, AND PROJECT INITIATION

Project Initiation and Planning will begin following execution of the Agreement.

Following the conclusion of the Welcome/IT Call, Motorola project personnel will communicate additional project information via email, phone call, or additional ad- hoc meetings.

Motorola utilizes Google Meet as its teleconference tool. If Customer desires a different teleconference tool, Customer may provide a mutually agreeable alternate tool at Customer expense.

### PROJECT MANAGEMENT TERMS

The following project management terms are used in this SOW. Since these terms may be used differently in other settings, these definitions are provided for clarity.

**Deployment Date(s)** refers to any date or range of dates when implementation, configuration, and training will occur. The deployment date(s) is subject to change based on equipment or resource availability and Customer readiness.

### COMPLETION CRITERIA

Motorola Integration Services are complete upon Motorola performing the last task listed in a series of responsibilities or as specifically stated in the deployment checklist. Certain Customer tasks, such as hardware installation activities identified in Section 1.9 of this SOW, must be completed prior to Motorola commencing with its delivery obligations. Customer will provide Motorola written notification that it does not accept the completion of Motorola responsibilities or rejects a Motorola service deliverable within five business days of task completion or receipt of a deliverable, whichever may be applicable.

Service completion will be acknowledged in accordance with the terms of the Agreement and the Service Completion Date will be memorialized by Motorola and Customer in a writing signed by both parties.

## PROJECT ROLES AND RESPONSIBILITIES OVERVIEW

### MOTOROLA PROJECT ROLES AND RESPONSIBILITIES

A Motorola team, made up of specialized personnel, will be assigned to the project under the direction of the Motorola Project Manager. Team members will be multi-disciplinary and may fill more than one role. Team members will be engaged in different phases of the project as necessary.

In order to maximize efficiencies, Motorola's project team will provide services remotely via teleconference, web-conference, or other remote method in fulfilling its commitments as outlined in this SOW.

The personnel role descriptions noted below provide an overview of typical project team members. One or more resources of the same type may be engaged as needed throughout the project. There may be other personnel engaged in the project at the discretion of and under the direction of the Project Manager.

Motorola's project management approach has been developed and refined based on lessons learned in the execution of hundreds of system implementations. Using experienced and dedicated people, industry-leading processes, and integrated software tools for effective project execution and control, we have developed and refined practices that support the design, production, and testing required to deliver a high-quality, feature-rich system.

#### Project Manager

A Motorola Project Manager will be assigned as the principal business representative and point of contact for Motorola. The Project Manager's responsibilities include the following:

- Host the Welcome/IT Call.
- Manage the Motorola responsibilities related to the delivery of the project.
- Coordinate schedules of the assigned Motorola personnel and applicable subcontractors/supplier resources.
- Manage the Change Order process per the Agreement.
- Maintain project communications with the Customer.
- Identify and manage project risks.
- Collaborative coordination of Customer resources to minimize and avoid project delays.
- Conduct remote status meetings on mutually agreed dates to discuss project status.
- Provide timely responses to issues related to project progress.

#### System Technologists

The Motorola System Technologists (ST) will work with the Customer project team on system provisioning. ST responsibilities include the following:

- Provide consultation services to the Customer regarding the provisioning and operation of the Motorola system.
- Provide provisioning and training to the Customer to set up and maintain the system.
- Complete the provisioning ownership handoff to the Customer.

- Complete the project-defined tasks as defined in this SOW.
- Confirmation that the delivered technical elements meet contracted requirements.
- Engagement throughout the duration of the delivery.

### Technical Trainer / Instructor

The Motorola Technical Trainer / Instructor provides training either on-site or remote (virtual) depending on the training topic and deployment type purchased. Responsibilities include:

- Review the role of the Learning eXperience Portal (“LXP”) in the delivery and provide Customer Username and Access Information.

## CUSTOMER PROJECT ROLES AND RESPONSIBILITIES OVERVIEW

The success of the project is dependent on early assignment of key Customer resources. In many cases, the Customer will provide project roles that correspond with Motorola’s project roles. It is critical that these resources are empowered to make decisions based on the Customer’s operational and administration needs. The Customer’s project team should be engaged from project initiation through beneficial use of the system. The continued involvement in the project and use of the system will convey the required knowledge to maintain the system post-completion of the project. In some cases, one person may fill multiple project roles. The project team must be committed to participate in activities for a successful implementation. In the event the Customer is unable to provide the roles identified in this section, Motorola may be able to supplement Customer resources at an additional price.

### Project Manager

The Project Manager will act as the primary Customer point of contact for the duration of the project. The Project Manager is responsible for management of any third-party vendors that are the Customer’s subcontractors. In the event the project involves multiple locations, Motorola will work exclusively with a single Customer-assigned Project Manager (the primary Project Manager). The Project Manager’s responsibilities include the following:

- Communicate and coordinate with other project participants.
- Manage the Customer project team, including timely facilitation of efforts, tasks, and activities.
- Maintain project communications with the Motorola Project Manager.
- Identify the efforts required of Customer staff to meet the task requirements in this SOW and identified in the Welcome/IT Call.
- Consolidate all project-related questions and queries from Customer staff to present to the Motorola Project Manager.
- Approve a deployment date offered by Motorola.
- Monitor the project to ensure resources are available as required.
- Attend status meetings.
- Provide timely responses to issues related to project progress.
- Liaise and coordinate with other agencies, Customer vendors, contractors, and common carriers.
- Review and administer change control procedures, hardware and software certification, and all related project tasks required to meet the deployment date.
- Ensure Customer vendors’ readiness ahead of the deployment date.
- Assign one or more personnel who will work with Motorola staff as needed for the duration of the project, including at least one Application Administrator for the system and one or more representative(s) from the IT department.

- Identify the resource with authority to formally acknowledge and approve change orders, completion of work, and payments in a timely manner.
- Provide building access to Motorola personnel to all Customer facilities where system equipment is to be installed during the project. Temporary identification cards are to be issued to Motorola personnel, if required for access to facilities.
- Ensure remote network connectivity and access to Motorola resources.
- Provide reasonable care to prevent equipment exposure to contaminants that cause damage to the equipment or interruption of service.
- Ensure a safe work environment for Motorola personnel.
- Identify and manage project risks.
- Point of contact to work with the Motorola System Technologists to facilitate the training plan.

### **IT Support Team**

The IT Support Team (or Customer designee) manages the technical efforts and ongoing tasks and activities of their system. Manage the Customer-owned provisioning maintenance and provide required information related to LAN, WAN, wireless networks, server, and client infrastructure. They must also be familiar with connectivity to internal, external, and third-party systems to which the Motorola system will interface.

The IT Support Team responsibilities include the following:

- Participate in overall delivery and training activities to understand the software, interfaces, and functionality of the system.
- Participate with the Customer subject matter experts during the provisioning process and training.
- Authorize global provisioning choices and decisions, and be the point(s) of contact for reporting and verifying problems and maintaining provisioning.
- Obtain inputs from other user agency stakeholders related to business processes and provisioning.
- Implement changes to Customer owned and maintained infrastructure in support of the Evidence Management System installation.

### **Subject Matter Experts**

The Subject Matter Experts (SME or Super Users) are the core group of users involved with delivery analysis, training, and the provisioning process, including making global provisioning choices and decisions. These members should be experienced users in the working area(s) they represent (dispatch, patrol, etc.), and should be empowered to make decisions related to provisioning elements, workflows, and department policies related to the Evidence Management System.

### **General Customer Responsibilities**

In addition to the Customer Responsibilities stated elsewhere in this SOW, the Customer is responsible for the following:

- All Customer-provided equipment, including hardware and third-party software, necessary for delivery of the System not specifically listed as a Motorola deliverable. This will include end user workstations, network equipment, camera equipment and the like.
- Configuration, maintenance, testing, and supporting the third-party systems the Customer operates which will be interfaced to as part of this project.
- Communication between Motorola and Customer's third-party vendors, as required, to enable Motorola to perform its duties.

- Active participation of Customer SMEs in project delivery meetings and working sessions during the course of the project. Customer SMEs will possess requisite knowledge of Customer operations and legacy system(s) and possess skills and abilities to operate and manage the system.
- Electronic versions of any documentation associated with the business processes identified.
- Providing a facility with the required computer and audio-visual equipment for training and work sessions.
- Ability to participate in remote project meeting sessions using Google Meet or a mutually agreeable, Customer-provided, alternate remote conferencing solution.

## PROJECT PLANNING

A clear understanding of the needs and expectations of both Motorola and the Customer are critical to fostering a collaborative environment of trust and mutual respect. Project Planning requires the gathering of project-specific information in order to set clear project expectations and guidelines, and set the foundation for a successful implementation.

### WELCOME/IT CALL - TELECONFERENCE/WEB MEETING

A Project Planning Session teleconference will be scheduled after the Agreement has been executed. The agenda will include the following:

- Review the Agreement documents.
- Review project delivery requirements as described in this SOW.
- Provide shipping information for all purchased equipment.
- Discuss deployment date activities.
- Provide assigned technician information.
- Review IT questionnaire and customer infrastructure.
- Discuss which tasks will be conducted by Motorola resources.
- Discuss Customer involvement in provisioning and data gathering to confirm understanding of the scope and required time commitments.
- Review the initial project tasks and incorporate Customer feedback.
- Confirm CJIS background investigations and fingerprint requirements for Motorola employees and/or contractors. Required fingerprints will be submitted on Motorola provided FBI FD-258 Fingerprint cards.
- Review the On-line Training system role in project delivery and provide Customer User Name and Access Information.
- Discuss Motorola remote access requirements (24-hour access to a secured two-way Internet connection to the Motorola system firewalls for the purposes of deployment, maintenance, and monitoring).
- Discuss Customer obligation to manage change among the stakeholder and user communities.
- Review deployment completion criteria and the process for transitioning to support.

### Motorola Responsibilities

- Host Welcome/IT Call.
- Request the attendance of any additional Customer resources that are instrumental in the project's success, as needed.
- Review Motorola's delivery approach and its reliance on Customer-provided remote access.
- Provide Customers with steps to follow to register for Online Training.
- Request user information required to establish the Customer in the LXP.

Any sales transaction following Motorola's quote is based on and subject to the terms and conditions of the valid and executed written contract between Customer and Motorola (the "Underlying Agreement") that authorizes Customer to purchase equipment and/or services or license software (collectively "Products"). If no Underlying Agreement exists between Motorola and Customer, then Motorola's Standard Terms of Use and Motorola's Standard Terms and Conditions of Sales and Supply shall govern the purchase of the Products.

### Customer Responsibilities

Complete the Online Training registration form and provide it to Motorola within ten business days of the Project Planning Session.

- Review the received (as part of order) and completed IT questionnaire.
- Provide a customer point of contact for the project.
- Provide data for completing the policy validation form.
- Provide LXP user information as requested by Motorola.
- Verify Customer Administrator(s) have access to the LXP.

### Motorola Deliverables

- Welcome Call presentation and key meeting notes
- Send an email confirming deployment date and ST assigned email
- Communicate with the Customer via email confirming shipment and tracking information.
- Instruct the Customer on How to Register for Training email.
- Provide and review the Training Plan.

## SOLUTION PROVISIONING

Solution provisioning includes the configuration of user configurable parameters (unit names, personnel, and status codes). The system will be provisioned using Motorola standard provisioning parameters and will incorporate Customer-specific provisioning.

### IN-CAR VIDEO PROVISIONING SCENARIO

If in-car video is a part of the system, the Motorola Application Specialist will complete the following provisioning tasks.

#### Motorola Responsibilities

- Conduct a remote review of the standard provisioning database with the Customer prior to the start of provisioning.
- Provide and review the Provisioning Export Worksheets with the Customer.
- Conduct a conference call with the Customer to review the completeness of the Provisioning Export Worksheets prior to the start of provisioning.

### BODY WORN CAMERA PROVISIONING SCENARIO

If body worn cameras are a part of the system, the provisioning of the in-car system will generally follow the completion of the base in-car video provisioning.

#### Motorola Responsibilities

Configure transfer stations for connectivity to the evidence management server.

- Configure devices within the evidence management system.
- Check out devices and create a test recording.

- Verify successful upload from devices after docking back into the transfer station or USB dock.

## SOFTWARE INSTALLATION

### ON-SITE SOFTWARE INSTALLATION

Client software will be installed on one workstations and up to 5 mobile devices to facilitate provisioning training to Customer personnel. Customer will complete software installation on the remaining workstations and cameras.

#### Motorola Responsibilities

- Verify system readiness.
- Request client software.
- Deliver the pre-installation preparation checklist.
- Provide instruction on client software installation and install client software on one workstation and up to five mobile devices.
- Total of training overview sessions shall not exceed 4 hours.
- Provide instruction on client software deployment utility.

#### Customer Responsibilities

- Provide and install workstation/mobile device hardware in accordance with specifications.
- Assign personnel to observe software installation training.
- Complete installation of client software on remaining workstations and mobile devices.
- Attend onsite deployment training sufficient to enable user proficiency.
- Complete online training.

#### Motorola Deliverables

- Provide a pre-installation preparation checklist.
- Provide installation guide.
- Provide training overviews on hardware/software and system administration for customers during deployment dates.

## INFRASTRUCTURE VALIDATION

Hardware will be installed on the network to facilitate provisioning, testing, and will be used to provide instruction to Customer personnel after the complete software installation.

#### Motorola Responsibilities

- Verify that the server is properly racked and connected to the network.
- Verify that access points are properly installed and connected to the network.
- Verify that transfer stations are connected to the network and configured.

#### Customer Responsibilities

Any sales transaction following Motorola's quote is based on and subject to the terms and conditions of the valid and executed written contract between Customer and Motorola (the "Underlying Agreement") that authorizes Customer to purchase equipment and/or services or license software (collectively "Products"). If no Underlying Agreement exists between Motorola and Customer, then Motorola's Standard Terms of Use and Motorola's Standard Terms and Conditions of Sales and Supply shall govern the purchase of the Products.

- Verify that the server network has access to the internet for software installation and updates.
- Verify that the network routing is correct for the transfer stations and access points to communicate with the server.
- Verify that the client computers can access the server on the required ports.

## HARDWARE INSTALLATION

Physical installation of hardware (i.e. servers, cameras, Access Points, WiFi docs, etc.) is not included in the standard scope of the solution. If a custom quote for installations is included in this purchase, Motorola will manage the subcontractor and their deliverables as part of this SOW. Customers who perform or procure their own installations assume all installation responsibilities including cost, oversight and risk.

## SYSTEM TRAINING

Motorola training consists of both computer-based (online) and instructor-led (on-site or remote). Training delivery methods vary depending on course content. Self-paced online training courses, additional live training, documentation, and resources can be accessed and registered for on the Motorola's LXP.

### ONLINE TRAINING

Online training is made available to the Customer via Motorola's LXP. This subscription service provides the Customer with continual access to our library of online learning content and allows users the benefit of learning at times convenient to them. Content is added and updated on a regular basis to keep information current. This training modality allows the Customer to engage in training when convenient.

A list of available online training courses can be found in the Training Plan.

### Motorola Responsibilities

- Designate a LXP Administrator to work with the Customer.
- Establish an accessible instance of the LXP for the Customer.
- Organize content to align with the Customer's selected technologies.
- Create initial Customer user accounts and a single Primary Administrator account.
- During on-boarding, assist the Customer with LXP usage by providing training and job aids as needed.
- Create and maintain user role Learning Paths defined by the Customer.
- Install security patches when available.

## **FUNCTIONAL VALIDATION AND PROJECT CLOSURE**

The objective of Functional Validation is to demonstrate the features and functions of the system in the Customer's provisioned environment. The functional demonstration may not exercise all functions of the system, if identified as not being applicable to the Customer's operations or for which the system has not been provisioned. The functional demonstration is a critical activity that must occur following the completion of provisioning.

#### **Motorola Responsibilities**

- Conduct a power on functional demonstration of the installed system per the deployment checklist
- Manage to resolution any documented punch list items noted on the deployment checklist.
- Provide trip report outlining all activities completed during the installation as well as outstanding follow up items
- Provide an overview of the support process and how to request support.
- Walk through support resources, web ticket entry and escalation procedures.
- Provide a customer survey upon closure of the project.

#### **Customer Responsibilities**

- Witness the functional demonstration and acknowledge its completion via signature on the deployment checklist.
- Participate in prioritizing the punch list.
- Coordinate and manage Customer action as noted in the punch list.
- Provide signatory approval on the deployment checklist providing Motorola with final acceptance.
- Complete Customer Survey.
