Subject: Written Determination of Chief Purchasing Officer - Emergency Procurement - Sanitary Survey Findings on LAC Water Storage Tanks

This is the written determination of the chief purchasing officer. There exists a threat to public health, welfare or safety. The nature of the emergency is described in the email below. By this email, I am authorizing Souder Miller and Associates to proceed with the action(s) requested by James Martinez or his designee prior to the execution of a Task Order under AGR23-52c.

The County will follow up with the written Task Order and corresponding Purchase Order as soon as practicable.

I further note competition has been performed for the required services. This emergency determination is necessary because the services need to be authorized and at least started prior to execution of the Task Order. Ref. Sec. 31-105.

DPU staff - It is my understanding that no procurement is needed at this time other than the procurement from Souder Miller. If that is not correct, or if anything needs to change, let me know.

If you have any questions, please contact me. Thank you.

Subject: Request and Emergency Procurement - Sanitary Survey Findings on LAC Water Storage Tanks

Annalisa & Derrill,

I am writing to request an emergency procurement to issue Souder Miller & Associates (SMA) a task order under AGR22-67b to support Los Alamos County Water Production with required potable water storage tank inspection and maintenance services.

On October 7 and October 8, 2025, the New Mexico Environment Department (NMED) conducted a Sanitary Survey of all potable water storage tanks in the Los Alamos and White Rock areas. NMED submitted its findings to the County on December 8, 2025. County staff are currently preparing a response letter to NMED, including photo documentation, to demonstrate that several identified items have already been remedied. Attached is the Corrective Action Plan we are preparing to submit to NMED.

As part of this response, we plan to procure SMA to provide tank investigation services and to coordinate with a subconsultant, Mountain West Tank Resources (MWTR). The subconsultant is available and ready to mobilize to begin work on 1/12/2026 now that we have some decent weather. If we are not able to complete this, MWTR will need to schedule several months in advance when they have another opening in the schedule to conduct dive inspections of the tanks to inspect internal conditions, measure sediment depth, collect samples, and evaluate repair needs. This effort will also help identify items that can be repaired relatively quickly and completed when MWTR is here diving (e.g., hatch door gasket replacement, target and pulley system repairs).

For items requiring more extensive repairs and longer timelines, SMA will prepare a scoping report outlining the recommended repairs along with associated cost estimates. This information will allow Los Alamos County to develop a realistic repair schedule and provide NMED with a well-informed and defensible timeline for completing the required work.

Please let me know if you need any additional information to proceed with this emergency procurement request.

Thank you,

James A. Martinez Jr., PE, PMP
