LACO_Operating Portfolio

Month End Commentary - December 2025

The final month of 2025 saw the continuation of a couple of ongoing themes in financial markets. First, the yield curve continued to steepen in December with short rates falling while yields on intermediate and longer tenors rose. The yield on the policy-sensitive 2-year Treasury note declined by two basis points to 3.47% while 5-year yields rose by 13 basis points to 3.73%. Secondly, equity investors continued their rotation out of the more volatile, high-beta tech stocks and into more defensive and less cyclical names. The S&P 500 index advanced by 0.06% in December bringing the total gain for the year to an impressive 18% while the Dow Jones Industrial Average advanced by 0.92% and 15%, respectively.

The month began with the release of a couple of unimpressive economic reports, including weak manufacturing data via the Institute for Supply Chain Management's PMI index and then the ADP employment report that showed the economy shed 32 thousand private sector jobs in November. Yields fell on the news and market participants who ramped up expectations for the Fed to lower rates for a third consecutive time at their December meeting were later vindicated when the FOMC followed through, lowering the Fed funds target to a median 3.625%. Conversely, the Bureau of Labor Statistics released initially delayed non-farm payrolls reports for both October and November which showed the labor market cooling, but not quite freezing. After a decrease of 105 thousand jobs in October, payrolls bounced back in November with the labor market beating expectations and adding 64 thousand workers to payrolls. What's more is that the October decline was heavily influenced by federal government employees who had accepted the deferred resignation offers earlier in the year but had continued to receive paychecks through September. Excluding this sector, non-farm payrolls would have shown a net gain of approximately 50 thousand.

As mentioned, the Fed slashed rates for a third consecutive time in 2025 in an effort to provide accommodation for a cooling labor market and ultimately, the broader economy. Following the meeting, Chairman Powell delivered remarks supporting the move in his post-meeting press conference citing softness in the labor market but was also cautious not to dismiss their mandate of price stability where he acknowledged that inflation has accelerated since the start of 2025. He went on to point out tariffs are a reason that inflation remains elevated above their 2% target but hedged his comment by noting that the duties are likely to only amount to a onetime increase in the price level. He further went on to mention that services inflation had continued to moderate. However, one could argue that the most revealing development to come out of the last Fed meeting of 2025 was a fresh set of official economic projections that showed the Fed revised growth forecasts higher, and inflation forecasts lower while anticipating only one rate cut in 2026.

As the Fed gears down its policy easing engine, we advise clients to manage durations in line with their respective, strategic targets to lock in rates while preferring a bulleted portfolio structure in anticipation of a continued steepening of the yield curve. Corporate spreads tightened in December after widening to five-month highs in November but remain historically tight leading us to maintain credit allocations at or slightly below target while favoring Treasury and agency debt where value can be extracted.

Treasury Curve Total Returns Last 12 Months

The changes in market values displayed represent approximations of principal changes given an instantaneous increase in interest rates. Changes in interest rates over longer periods would most likely mitigate the impact of an instantaneous change through the addition of the interest income received on the investments within the portfolio. Additional impacts to consider when estimating future principal changes also include, but are not limited to, changes in the shape of the yield curve, changes in credit spreads.

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Performance Calculation: Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
