NUCLEAR
FORUM

WHERE HISTORY POWERS WHAT'S NEXT

Deploying the Next Generation
of Nuclear Energy

AUGUST 25, 2026

LOS ALAMOS, NEW MEXICO

SCIENCE. POLICY. INDUSTRY. DEPLOYMENT.

Attachment A

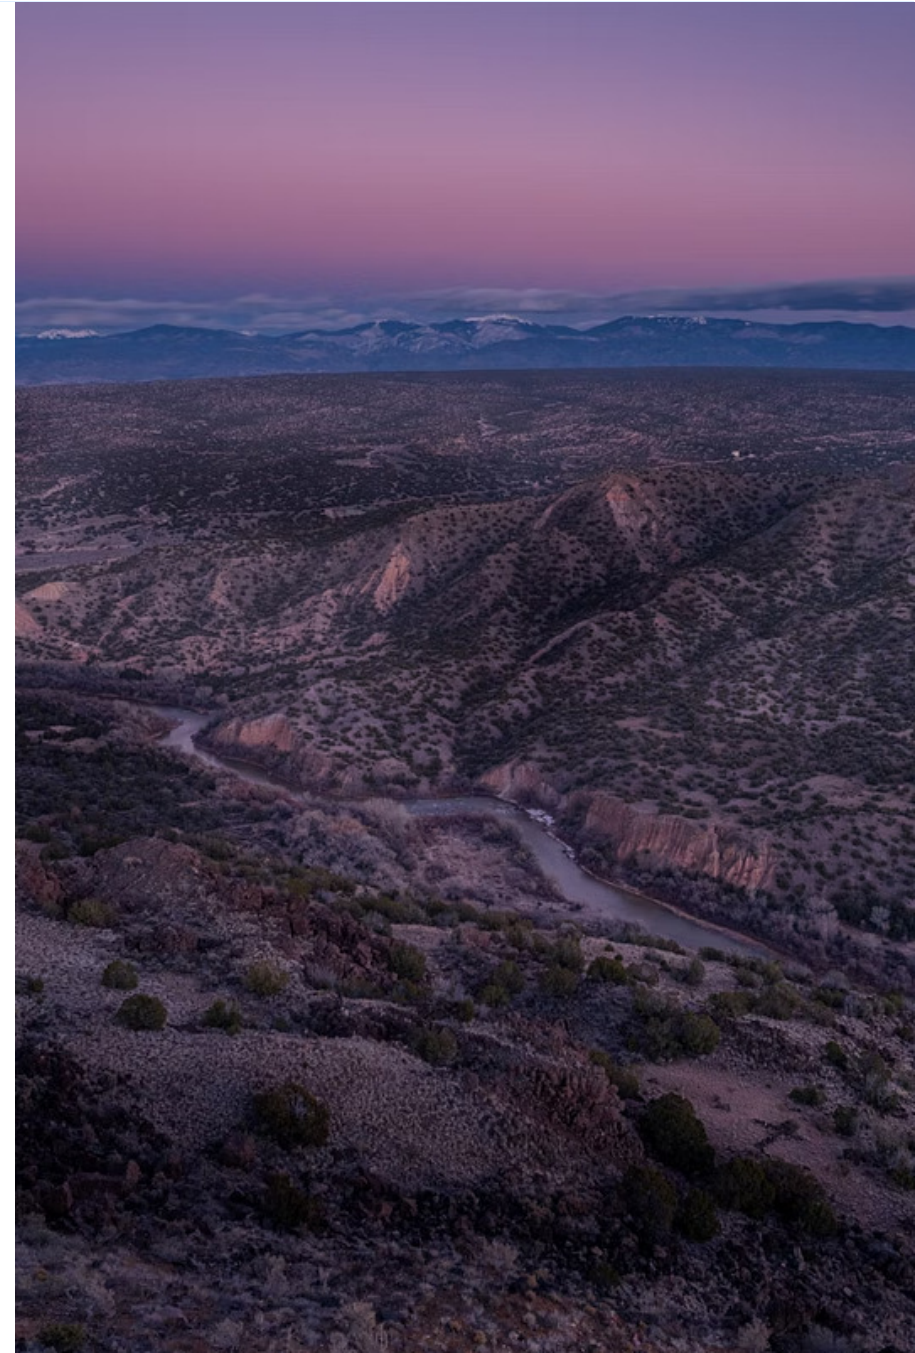

Event Details

Date: August 25, 2026

Location: SALA Event Center 2551 Central Ave., Los Alamos, NM 87544

Format: In-person + Virtual Livestream

The 2026 Los Alamos Nuclear Forum brings together the nation's most influential voices in nuclear energy, infrastructure, and policy for a single high-impact day of dialogue, demonstration, and deal-making , broadcast live to a national and international audience.

From Legacy to Deployment: The Next Chapter of Nuclear Energy

Known globally as the birthplace of the Manhattan Project, Los Alamos shaped the earliest chapter of nuclear science through the work of the Los Alamos National Laboratory. What began as a moment of urgency during World War II evolved into decades of scientific leadership, innovation, and national security research.

Today, that legacy continues, but the conversation has expanded.

Los Alamos is now a place where nuclear technology is being reimaged for modern needs: resilient energy systems, advanced reactors, national security infrastructure, and the growing demands of data and industry. Hosting the forum here creates a direct line between where nuclear began and where it is going.

The next chapter of nuclear energy will be defined by collaboration, investment, and real-world application.

PRESENTING PARTNER

Premier Leadership Sponsor | \$7,500

Designed for organizations leading deployment, infrastructure modernization, advanced energy innovation, national security, and long-term energy resilience.

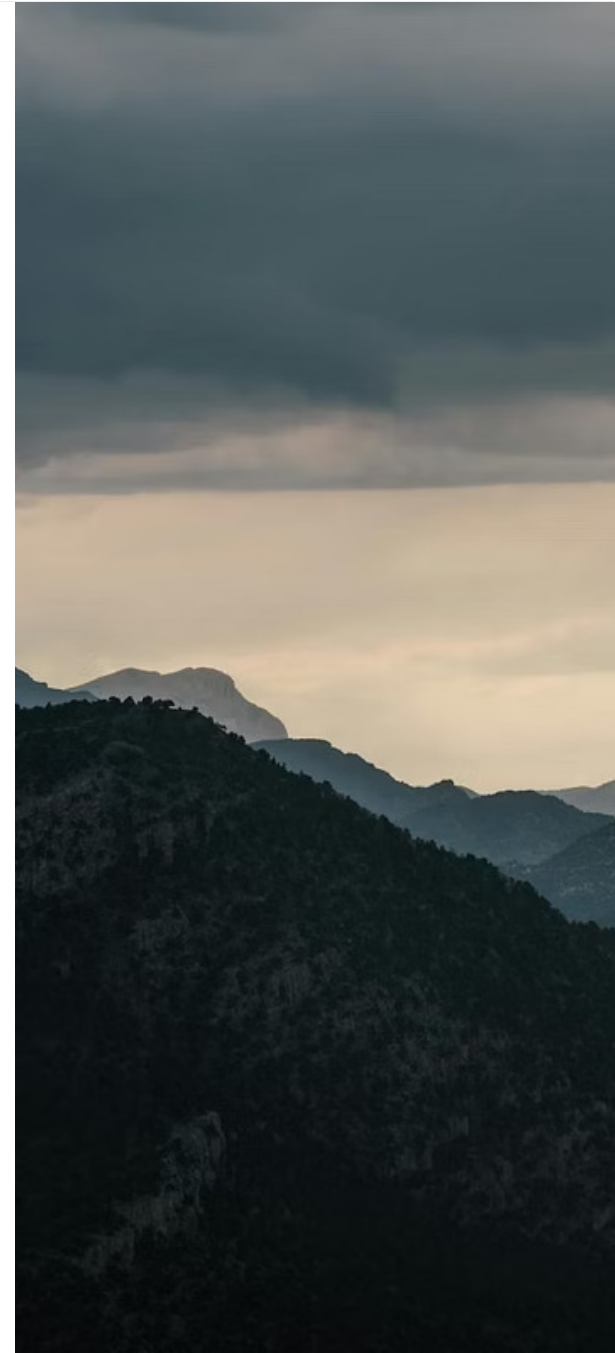

- Premier logo placement on Forum materials and signage
- Recognition as a Presenting Partner
