
General Information

All County Board and Commission members must be residents of Los Alamos County. Lodgers' Tax Advisory Board members, except the at-large community member, do not need to be residents if they are employed/represent an attraction or hotel.

Once a resident fills out and submits this application, an interview is scheduled with the B&C's County Council liaison, the relevant staff liaison, and the B&C Chair. After the interviews, the applicants' names are presented to the full Council during a regularly scheduled Council meeting, where a vote is taken regarding the appointment of each applicant. Each applicant will be notified if they are appointed or not.

Only on-line applications will be considered.

Note: Please be aware that as a public entity, the County of Los Alamos, is obligated to furnish this information to the public if requested.

Interests & Experiences

Why would you like to serve on this particular Board or Commission?

I have long been interested in community environmental health, in topics ranging from air quality and water quality to sustainable energy and water security. I am currently employed in Industrial Hygiene, and so my day to day work is focused on worker populations. I would like to expand to include community populations and public health initiatives.

What would you like to accomplish during your tenure on this Board or Commission? (Please identify any special interests you have that led you to become interested in serving on this Board or Commission.)

There are several topics that I am interested in that I would like to present to the board: - Improving air quality, cooling cities, and remediating toxic waste through the use of plants - Living walls -Making rainwater collection more common and attainable for homeowners - Robust water filtration systems that can be installed in homes to improve water security and make residents less susceptible to contamination -Educating homeowners on other methods of water conservation such as grey water systems, planting native species, etc. -Perhaps putting together a team that can help with installation -Using ideas from other sustainability groups that can be implemented in Los Alamos I am also interested in understanding the inner workings of implementing sustainable initiatives and how to track current initiatives, progress, and set backs both locally and state-wide.
